

## Generic Premium

Generic Premium helps you offer quality drug coverage to your employees. It covers most generic drugs, plus some common brand drugs. With Generic Premium, your employees get the medicine they need at a price they can afford. And you can trim health care costs.

**What is Generic Premium?**

Generic Premium provides coverage for most generic drugs, which helps you and your employees save money. Some brand drugs are covered too, including those used to treat common conditions like high blood pressure, diabetes, high cholesterol, ulcers and more. That gives your employees a choice of quality drugs.

**How it works**

Employees should talk to their doctors about using drugs covered by Generic Premium. If the employee and doctor agree that a covered drug is a good treatment option, the employee will need a new prescription. Then, they can fill the prescription at a retail pharmacy or through home delivery.

**Why generics?**

Generic and brand drugs have the same active ingredient, strength and dose. The Food and Drug Administration (FDA) requires generics to meet the same high standards for purity, quality, safety and strength. Plus, generics normally cost 30 to 60% less than brand versions. Generics have the same quality as brand drugs, but at a much lower cost.

**Drug coverage at a glance**

The Generic Premium drug list includes products used for the health needs and conditions below, plus many more. See the next pages for a list of covered drugs.

- Attention deficit hyperactivity disorder (ADHD)
- Arthritis
- Asthma
- Birth control
- Depression
- Diabetes drugs and supplies
- Enlarged prostate
- Glaucoma
- High blood pressure
- High cholesterol
- Infections
- Osteoporosis
- Overactive bladder
- Pain
- Prenatal vitamins
- Seizures
- Sleep aids
- Ulcers

## TIER 1

contraceptives – all prescription strength, self administered generic contraceptives

cough and cold preparations – all prescription strength, self administered, generic cough and cold preparations

pancreatic enzymes – all prescription strength, self administered, generic pancreatic enzymes

PKU – all prescription strength, self administered, generic PKU formulas

vitamins – all prescription strength, self administered, generic vitamins

acarbose (Precose)\*

acebutolol hcl (Sectral)\*

acetaminophen/butalbital (Phrenilin)\*

acetaminophen/caffeine/butalbital (Fioricet)\* **QL**

acetaminophen/codeine (Tylenol w/Codeine)\* **QL**

acetaminophen/Phenyltoloxamine (Dologesic, various)\*

acetazolamide (Diamox)\*

acetic acid (VoSol)\*

acetic acid/aluminum acetate (Domeboro)\*

acetic acid/hydrocortisone (VoSol HC)\*

acetylcysteine (Mucomyst)\*

acyclovir (Zovirax)\*

adapalene (Differin)\*

albuterol – oral **QL**

albuterol sulfate (Proventil)\* **QL**

albuterol/ipratropium nebulizer soln (Duoneb)\*

alclometasone dipropionate (Aclovate)\*

alendronate (Fosamax)\* **QL**

allopurinol (Zyloprim)\*

alprazolam (Xanax, Xanax XR)\*

amantadine hcl (Symmetrel)\*

amcinonide (Cyclocort)\*

aminophylline

amiodarone hcl (Cordarone, Pacerone)\*

amitriptyline hcl (Elavil)\*

amlodipine besylate (Norvasc)\*  
**DO**

amlodipine besylate/benazepril (Lotrel)\*

amoxapine (Asendin)\*

amoxicillin trihydrate (Amoxil, Trimox, various)\*

amoxicillin trihydrate/potassium clavulanate (Augmentin, XR)\* **QL**

amphetamine salt combo (Adderall)\*

ampicillin trihydrate (Principen)\*

amylase/lipase/protease (Creon, Pancrease, Pancrease MT, Ultrase, Ultrase MT)\*<sup>^</sup>

anagrelide hcl (Agylin)\*

anthralin (Drithocreme HP)\*

antipyrine/benzocaine/glycerin (Auralgan)\*

aspirin/codeine phosphate

atenolol (Tenormin)\*

atenolol/chlorthalidone (Tenoretic)\*

atropine sulfate (Isopto Atropine)\*

azathioprine (Imuran)\*

azelastine (Optivar)\* **QL**

azelastine (Astelin Nasal)\* **QL**

azithromycin (Zithromax)\* **QL**

bacitracin/polymyxin b sulfate (Polysporin Ointment)\*

baclofen (Lioresal)\*

balsalazide disodium

belladonna alkaloids/phenobarbital (Donnatal)\*

benazepril hcl (Lotensin)\*

benazepril/hydrochlorothiazide (Lotensin HCT)\*

benzonatate (Tessalon Perles)\*

benzoyl peroxide (Benzagel, Benzac AC, various)\*

benztropine mesylate (Cogentin)\*

betamethasone dipropionate (Diprosone, Diprolene, Diprosone)\*

betamethasone valerate (Betatrex)\*

betamethasone dipropionate/propylene glycol (Diprolene AF)\*

betaxolol hcl (Betoptic)\*

bethanechol chloride (Urecholine)\*

bisoprolol/hydrochlorothiazide (Ziac)\*

bisoprolol fumarate (Zebeta)\*

**Generic drugs** are listed in all lowercase letters.

**Brand drugs** are listed with a first capital letter.

**Tier 1** drugs have the lowest copay. Many Tier 1 drugs are generics.

**Tier 2** drugs have a medium copay and offer a good value.

**Tier 3** drugs have the highest copay. Many of these drugs treat complex, ongoing conditions and may require special handling.

**PA** = Prior authorization is needed. In this case, members must receive approval before the drug is covered.

**QL** = Quantity limits are needed. Some drugs have limits on the amount members receive for each prescription or each month.

**ST** = Step therapy is needed. Members may need to try another drug before we'll provide coverage for the medicine.

**DO** = Dose optimization is needed. This usually means that members take the drug once a day instead of twice a day.

\* Generic versions of these drugs are covered. The brand name in parenthesis is only for reference.

<sup>^</sup> These drugs often require the doctor to carefully monitor the dose to make sure the drug works best for the person. In general, members shouldn't switch between the brand and generic versions of these drugs. The plan covers both the brand and generic versions.

<sup>†</sup> Once a generic is available, the brand version will not be covered.

Key

brimonidine tartrate (Alphagan)\*

bromocriptine mesylate (Parlodel)\*

bumetanide (Bumex)\*

buprenorphine (Subutex)\* **QL**

bupropion hcl (Wellbutrin, Wellbutrin SR)\*
